4	<p>متن زیرا بخوانید و به سوالات پاسخ دهید.</p> <p>It may be interesting for us to know something about birds. Birds don't fly high up in the sky because the thin air there does not hold them up and also it becomes difficult for them to breathe. They fly near the ground so that they can see where they are and look for places they know. Some sea birds fly so low over the sea that waves often hide them. There is a short distance between summer and winter homes of some birds while others fly thousands of miles. Many birds fly at night, so that they can rest and eat during the day. They know when to fly south. Perhaps, cold weather and autumn days tell them when to migrate. They fly south because they know when winter comes, there will be little food for them to eat in the north. But there, they can find plenty of insects, seeds, and fruit to eat. Still, we do not know many things about birds.</p> <p>55. According to the passage, some birds start to fly south in .....  a. autumn                      b. spring                      c. summer                      d. winter</p> <p>56. Birds do not fly high up in the sky because they ..... there.  a. can eat and rest                      b. can find fruits  c. can look for places                      d. cannot breathe well</p> <p>57. Some birds fly at night because they .....  a. are able to fly much faster than                      b. are afraid of flying during the day  c. can find food better in daylight                      d. can breathe more easily at night</p> <p>58. How do birds know when to fly south?</p>		13
