## C: Comprehension: (۲ Pts.)

Read the passage carefully.

### Sunlight

Spending a long time in the sun is dangerous and can give you skin cancer. But not spending enough time in the sun is also bad for you because sunlight helps us to make vitamin D. This vitamin is important for strong bones and a healthy immune system, and it also makes people feel happier. Nowadays, many people don't get enough sunlight because they wear sunscreen all the time, especially on their faces. However, don't spend too long in the sun- ۱۵ minutes a day without sunscreen is a healthy amount, and not at midday.

۱. Give complete answer to the following question. (۱,۵ point for each)

۳۷. Why is it bad to spend a long time in the sun?

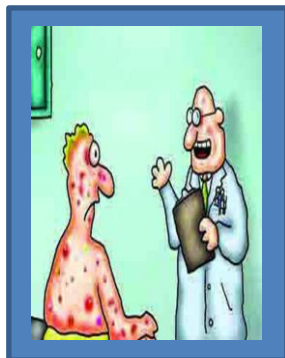

۲. Write "T" for true and "F" for false statements. (۱,۲۵ point for each)

۳۸. ...We need vitamin D only for powerful bones.

۳۹. ...A few people get enough sunlight these days.

۳. Match the words or phrases with the pictures. (There is one word or phrase you don't need.)  
(۱,۲۵ point for each)

*[sunlight, skin cancer, wear sunscreen, broken bones, strong bones]*
